1 Executive Summary

This report provides KeyInvest a detailed understanding on the performance of the investment options on KeyInvest's Approved Product List (APL) prepared as of 30/6/2025.

The consolidated APL is a single definitive list of financial products available via the Fund's platform, termed as "one" member investment choice options (investment options/products) and consists of:

- Unlisted Managed Funds
- ETFs
- LICs

In order to perform this analysis, all products on an APL have been categorised into a definitive list of asset classes (Refer to Appendix B) that accurately reflect its investment style and strategy. From this asset class, a peer group average of all the investment's historical performance and risk metrics are calculated to quantify lower and upper trigger levels that will then be used as a threshold for underperforming and outperforming investments. The asset consultant will monitor products on the APL based on the following classifications:

Classification	Alpha Test	Risk-adjusted Test	Factor Test	Qualitative Review
Approved	√	-	-	-
Approved	x	√	-	-
On Watch	x	x	√	-
On Hold	x	x	x	√
Redeem	x	x	x	x

Table 2 below summarises the results of our findings. There are 2 funds whose data are insufficient for analysis. Refer to Section 4 Results - APL Monitoring.

Table 2: The number of failed and outperformed funds in categories

Category	Total	Alpha Failed	Risk-adjusted Failed	Factor Failed	Outperformed
Alternatives - Growth Illiquid	2	0	0	0	0
Diversified Balanced	2	0	0	0	0
Diversified Moderate	1	0	0	0	0

Conclusion

- All funds on the Approved Product List of KeyInevst have been approved over the assessed period.

Recommendation

- No recommendations in this review.

2 Introduction

KeyInvest Financial Services is a South Australian-based, member-owned mutual Friendly Society with origins dating back to 1878. Regulated by APRA and holding an AFSL, KeyInvest specialises in tax-effective investment solutions, including investment bonds, funeral bonds, and private credit opportunities tailored for both retail and wholesale investors. The organisation has recently undergone strategic changes—merging with Australian Friendly Society Ltd and acquiring a stake in Keystone Capital Ltd—to bolster its presence in the funeral bond and private credit sectors. With over \$429 million in funds under management as of June 2024, KeyInvest has divested from its retirement village operations to focus on delivering flexible, compliant, and long-term wealth and estate planning solutions through financial advisers across Australia.

The asset consultant (Atchison Consultants) has formulated an approach that monitors the performance and risk measurement of each standalone investment option and provides a report to KeyInvest based on quantitative analysis.

The APL is a single definitive list of financial products available via the Fund's platform, termed as "one" member investment choice options and consists of:

- Unlisted Managed Funds
- ETFs
- LICs

The asset consultant will undertake monthly collection of investment returns for the above three lists of products. Monitoring on a quarterly basis (June, September, December, and March) all Unlisted Managed Funds, ETFs and LICs including:

- Performance against benchmark index and peer group
- Identify the underperformance of products
- Provide recommendations for retention and removal of products from the APL
- Change of independent investment rating

The purpose of this report is to provide a compliance review of all approved products on the APL to ensure approved products are regularly reviewed via rigorous quantitative and qualitative due diligence so that material changes in the economic environment and operational changes are reflected in the status of the approved products. This monitoring framework is designed to comply with regulatory requirements such as APRA SPS530.

In accordance with Investment Management Agreement the asset consultant will monitor products on the APL based on the following classifications:

Classification	Alpha Test	Risk-adjusted Test	Factor Test	Qualitative Review
Approved	√	-	-	-
Approved	x	√	-	-
On Watch	x	x	√	-
On Hold	x	x	x	√
Redeem	x	x	x	x

All products on the APL will be reviewed on a quarterly basis:

- KeyInvest is required to be aware of the funds that are "On Watch" or "On Hold", which should be closely monitored on a monthly basis
- Funds that are classified as "On Watch" for consecutive 3 quarters will be proceeded to manual review process
- Funds that are classified as "On Hold" for consecutive 3 quarters will be reclassified as "Redeem"
- The review history will be recorded in Atchison's database and available upon request.

3 Methodology

3.1 Quantitative Assessment

The quantitative assessment, for all asset classes, is investment performance based, using historical monthly product investment performance, post investment management fees. Note that this assessment methodology has considered references made in the ASIC Report 779, February 2024 in relation to performance monitoring and is constantly being refined.

Performance of each product is assessed relative to their major asset class category benchmark, with the objective of identifying any products that exhibit significant or sustained underperformance (i.e. negative alpha/negative risk metrics) which may lead to an additional review. For products that exhibit outperformance factor model analysis is utilized (refer to “APL Monitoring Process” below) to explain factor exposures that contribute to outperformance.

All active and passive investment strategies are categorized based on the product’s characteristic and investment strategy and subsequently allocated to a specific benchmark index. Refer to Appendix C.

Performance over the 3-year (annualised) periods are assessed in combination together with risk metrics e.g. Sharpe ratio and information ratio.

Trigger levels are defined by establishing a peer group of each of asset class category and formulating the mean Alpha, Information Ratio and Sharpe Ratio. The range of the trigger levels are calculated from subtracting a multiple of the standard deviations away from the mean. There are two trigger levels established to track the performance of active and passive products.

There is an “Green” trigger and a “Red” trigger.

- Green serves as a threshold for investment strategies that have outperformed its relative benchmark
- Red prompts an action. Refer to tables below

The Red trigger level leads, if breached, to an assessment:

- Medium - Long Term Trigger – 3-year (annualised) performance trigger

For investment products that do not have a 3-year track record, only 1-year alpha test is used to assess the product (without quantified trigger levels), as it does not have a meaningful track record to determine an investment manager’s skill.

3.2 Quantifying Trigger Levels

The methodology to quantify red and green trigger levels are based on a standard distribution measure, derived from a large sample of peers per each asset class category.

Mean minus/plus two standard deviations (red/green trigger levels) cover 95% of the observed values, meaning that 5% of the observed values that lies beyond this range will be flagged as underperformers or outperformers.

As the mean values of each of the peers will vary each month, the green and red trigger levels are not a fixed value. It will vary depending on the product’s performance and market conditions impacting specific asset categories.

Table 3: Trigger levels identification

3 Year Alpha		3 Year Weighted Average of Information Ratio and Sharpe Ratio		Factor Model Error
Green Trigger	Red Trigger	Green Trigger	Red Trigger	Red Trigger
Mean + 2 Standard Deviation	Mean - 2 Standard Deviation	Mean + 2 Standard Deviation	Mean - 2 Standard Deviation	> Mean + 2 Standard Deviation

3.3 APL Monitoring Process

Investment monitoring is assessed by four key criteria (Stages) based on the investment's performance, risk adjusted metrics and factor analysis.

Stage 1: Benchmark Alpha Test

In stage 1, Alpha (outperformance of manager's performance over category benchmark) is assessed over a 3-year period to evaluate manager's ability to outperform the category benchmark over the medium to long term period. Based on the determined red trigger level of the fund's category, the fund is flagged for further assessment when its Alpha fails to outperform the trigger level and requires further testing.

Funds that pass stage one, are classified as "Approved".

Stage 2: Risk Adjusted Test

In stage 2, an assessment of the fund's risk metrics, Information Ratio (additional amount of return per unit of increase in risk) and Sharpe Ratio (excess return per unit of total risk) are performed to identify the product's risk adjusted return. This analysis provides a fundamental understanding of the product's underperformance by considering the fund's risk return profile. Both the application and purpose of the Information Ratio and Sharpe Ratio is to provide constructive detail of fund's risk and return characteristics, the 3-year weighted average of Information Ratio and Sharpe Ratio is used as the criteria for the risk adjusted test.

For funds that pass stage two, are classified as "Approved".

Stage 3: Factor Model Analysis Test

Factor analysis is employed to statistically describe the association between an asset (be it an asset class, investment product, or individual security) and relative economic factors to evaluate the asset's performance. In collaboration with the Fama-French Factor Model and the Random Forrest Modelling, a set of models are constructed to establish key factors that influence the behaviour of the asset and subsequently assessed against trigger levels (Factor Analysis: Green and Red).

In terms of identified factors for each asset, multivariate regression models will be built to project a list of expected monthly returns of the fund for 3 years.

The mean squared error will be calculated based on the difference between the expected and real monthly returns. Subsequently the trigger level is derived from the distribution of the peer group, refer to table below.

Stage 3: Factor Analysis	
Green Trigger	Red Trigger
Errors $\leq$ Mean + 2 Standard Deviation	Errors $>$ Mean + 2 Standard Deviation

- Which factors (chosen from the Fama-French Factor Model or Random Forest Model) significantly contribute to the performance of a specific fund.
- The contribution (positive or negative) of each factor to the expected average monthly return of the fund

For funds that pass stage three, are classified as "On Watch".

Stage 4: Manual Analyst Review

In stage 4, qualitative due diligence of the fund is performed to assess the underlying reason of underperformance. This stage involves directly meeting with the fund managers to evaluate any material changes in key personnel, investment process and/or stock selection. Qualitative research will also utilise external research reports for decision making. The final opinion and decision will factor both qualitative and quantitative research.

Stage 4 is conducted subject to approval from the Trustee.

This is the last stage of the APL Monitoring Process in which funds that pass stage 4 will be classified as “On Hold” and funds that fail will be classified as “Redeem”.

The whole APL Monitoring Process can be summarised as the tree diagram below.

Figure 1: APL Monitoring Diagram

4 Results - APL Monitoring

Through the quantitative assessment process, the asset consultant has identified investment products as under and out performers within their respective asset class peer group. To display these results, a scatter plot chart is utilised to graph all investment products within its specified asset class using the 3 year alpha (X-axis) and 3 year weighted information and Sharpe ratio (Y-axis).

To interpret the charts:

- The X-axis (3-year alpha) represents stage 1 alpha benchmark test
- The Y-axis (3-year weighted ratio) represents stage 2 risk adjusted test
- The blue rectangle represents the red trigger limits (underperformers) of the 3-year alpha and weighted ratio respectively
- The red area represents the funds with relatively poor performance, whereas the green area indicates those with relatively good performance. The gradient means the extent of a fund outperforms/underperforms its peer group
- The yellow and blue dot plots collectively represent the total peer group of their respective asset group.
- The yellow dot plots represent investment products that are not on APL
- The blue dot plots represent investment products that are on the APL

Both the green and red trigger limits divide the chart into nine windows that represent which stage of the test the investment products pass/fail. The focus of the chart for the purpose of this report is the upper right and lower left quadrants as it illustrates whether the strategy has outperformed and underperformed both stage 1 and 2 trigger limits respectively.

Please note that only investment products with over 3-year history are included in these charts. For products with less than 3-year history, refer to the performance tables in Appendix B.

At the date of this report, the following funds have insufficient data for analysis:

- Hamilton Lane Global Private Assets

At the date of this report, the following funds are less than 1 year:

- Metrics Real Estate Multi-Strategy Fund

54	Paradice Equity Alpha Plus Fund	ETL8096AU	True	-	-	Approved	No

Vanguard Australian Shares Index Fund

The fund is managed to closely track the risk characteristics of the index, while minimising transaction costs and effectively managing index changes. Through a buy and hold investment strategy the fund offers a tax-efficient solution for investors seeking to gain broad exposure to the Australian share market at low cost. The Vanguard Australian Shares Index Fund seeks to track the return of the S&P/ASX 300 Index before taking into account fees, expenses and tax.

Russell Investments Australian Shares Fund — Class A

The Fund invests predominantly in shares and unit trusts listed or about to be listed on the Australian Securities Exchange. Derivatives may be used to obtain or reduce exposure to securities and markets, to implement investment strategies and to manage risk. To provide a total return, before costs and tax, higher than the Fund's benchmark over the long term by providing exposure to a diversified portfolio of predominantly Australian shares.

iShares Australian Equity Index Fund

The strategy uses a full-replication approach to match the performance of the benchmark. This approach aims to purchase every security in the relevant index. We take into consideration the short-term transaction costs associated with acquiring a particular stock. Each security is held in the portfolio at, or close to, its index weight. As a result, security-level tracking error and security-specific risk are minimised. The Fund aims to provide investors with the performance of the market, before fees, as measured by the S&P/ASX 300 TR Index (Index).

Alphinity Sustainable Share Fund

The Fund provides a diversified portfolio of Australian stocks listed on the ASX that have strong Environment, Social and Governance (ESG) characteristics and, where possible, contribute towards the advancement of the UN Sustainable Development Goals (SDG) agenda. The Fund aims to outperform its benchmark after costs and over rolling five-year periods.

AB Managed Volatility Equities Fund - MVE Class

The MVE Class is designed for equity investors seeking: ++ lower volatility; ++ reduced downside risk in falling equity markets; and ++ the potential for long term capital growth and some income, including franked Australian dividend income. The Fund invests mainly in Australian Securities Exchange (ASX) listed shares with up to 20% of its assets in global developed market shares and has the ability to hold up to 20% in cash, for example as a short term defensive measure at times of heightened equity market volatility. The MVE Class implements a managed volatility equities strategy that aims to reduce volatility by identifying, and investing in, high quality listed equity securities that have reasonable valuations, high quality cash flows and relatively stable share prices. The MVE Class does not always hedge the foreign currency exposures of its global equity assets to Australian dollars but the investment manager has the discretion to determine the extent to which any foreign currency exposure is reduced or removed. For example, the investment manager may decide not to remove a foreign currency exposure if it believes it offers defensive characteristics which would assist in lowering the volatility of the Fund. The MVE Class may also invest in preference shares, rights, convertibles, warrants, securities we reasonably expect to be listed within six months including initial public offerings, listed trusts and/or other synthetic foreign equity securities. Derivatives may be used to manage risks, invest cash, manage volatility and gain or reduce investment exposures. Derivatives will not be used for leveraging or gearing purposes. The AB Managed Volatility Equities Fund - MVE Class (the "MVE Class") aims to achieve returns that exceed the S&P/ASX 300 Accumulation Index after fees over the medium to long term. There is no guarantee that the MVE Class will achieve this objective or produce any returns.

Fidelity Australian Equities Fund

The Fund invests in the Underlying Fund. The Underlying Fund seeks to invest in a diversified selection of Global Securities which typically have a track record of strong, sustainable dividend growth as well as strong capital growth. The portfolio manager believes that dividend growth drives the majority of total return over the long term. Within this framework, the Underlying Fund also seeks high quality, resilient companies with low levels of debt, sound management and reasonable valuations. To achieve returns in excess of the benchmark over the medium to long term.

Perpetual Geared Australian Share Fund

Perpetual researches companies of all sizes using consistent share selection criteria. Perpetual's priority is to select those companies that represent the best investment quality and are appropriately priced. Aims to enhance long-term capital growth through borrowing (gearing) to invest predominantly in quality Australian industrial and resource shares. To Outperform the S&P/ASX 300 Accumulation Index (before fees and taxes) over rolling three-year periods.

VanEck Australian Equal Weight ETF

The fund using a passive or indexing investment approach, attempts to approximate the investment performance of its benchmark index by investing in a portfolio of securities that generally replicates its benchmark index. The Fund aims to provide investment returns before fees and other costs which track the performance of the MVIS Australia Equal Weight Index

Pendal Focus Australian Share Fund

The Pendal Focus Australian Share Fund is an actively managed concentrated portfolio of primarily 15-30 Australian shares. This Fund is designed for investors who want the potential for long term capital growth and tax effective income and are prepared to accept higher variability of returns. The Fund aims to provide a return (before fees, costs and taxes) that significantly exceeds the S&P/ASX 300 (TR) Index over the medium to long term.

Paradice Equity Alpha Plus Fund

The Paradise Long Short Australian Equities Fund ('the Fund') is a fundamental, long-biased 'long/short' Australian equity offering that employs a core investment style. The Fund can hold between 20 to 60 longs and 0 to 50 shorts positions. The Fund aims to outperform the S&P/ASX 200 Total Return Index (after fees and before taxes) over the medium to long term.

Conclusion

- No funds in the Australia Large Blend Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.2 Australia Large Growth Equity

Figure 3: Alpha VS Weighted Ratio of Australia Large Growth Equity

Table 4: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
4	Greencape Broadcap Fund	HOW0034AU	True	-	-	Approved	No
33	Smallco Broadcap Fund	ASC0003AU	True	-	-	Approved	No
35	Greencape High Conviction Fund	HOW0035AU	True	-	-	Approved	No

Greencape Broadcap Fund

The Greencape Broadcap Fund is an Australian equities fund which can take positions in companies of all sizes. It offers investors access to a diversified portfolio of large, mid and small cap Australian shares, providing the potential for capital growth above the S&P/ASX 300 Accumulation Index over the medium to long term. The Fund aims to outperform its benchmark over rolling three-year periods

Smallco Broadcap Fund

SBF invests in Australian listed companies and may also hold some cash. To take advantage of Smallco's background and experience in smaller listed companies SBF can invest up to 40% of the Fund outside of the S&P/ASX 100 and, to date, has typically been between 25-40% invested in these companies. Aims to achieve returns 5% pa above the S&P/ASX 300 Accumulation Index after fees on a rolling three year basis. Note the investment return objective is not intended to be a forecast. It is merely an indication of what the Fund aims to achieve over the medium to long term..

Greencape High Conviction Fund

The Greencape High Conviction Fund offers investors access to a highly concentrated portfolio of stocks. It can invest in Australian listed companies as well as up to 10% in stocks listed on any international stock exchange. Greencape aims to fully hedge any international asset exposure back to Australian dollars. The Fund aims to outperform its benchmark over rolling three-year periods.

Conclusion

- No funds in the Australia Large Growth Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.3 Australia Large Value Equity

Figure 4: Alpha VS Weighted Ratio of Australia Large Value Equity

Table 5: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
6	Investors Mutual Australian Share Fund	IML0002AU	True	-	-	Approved	No

Investors Mutual Australian Share Fund

The Fund will invest in a diversified portfolio of quality ASX listed Australian industrial and resource shares, where these shares are identified by our investment team as being undervalued. To provide a rate of return (after fees and expenses and before taxes) which exceeds the return of the Fund's Benchmark on a rolling four-year basis.

Conclusion

- No funds in the Australia Large Value Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.4 World Large Blend Equity

Figure 5: Alpha VS Weighted Ratio of World Large Blend Equity

Table 6: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
10	Vanguard Wholesale International Shares Index Fund	VAN0003AU	True	-	-	Approved	No
11	iShares International Equity Index Fund	BGL0106AU	True	-	-	Approved	No
12	Russell Investments International Shares Fund — Class A	RIM0008AU	True	-	-	Approved	No
13	Magellan Global Fund	MGE0001AU	True	-	-	Approved	No
37	VanEck MSCI World ex Australia Quality (Hedged) ETF	QHAL-AU	True	-	-	Approved	No
38	VanEck MSCI World ex Australia Quality ETF	QUAL-AU	True	-	-	Approved	No

Vanguard Wholesale International Shares Index Fund

The fund is managed to closely track the risk and return characteristics of the index, while minimising transaction costs and effectively managing index changes. The fund will hold most of the shares in the index, allowing individual share weighting to vary marginally from the index from time to time. The Fund seeks to track the return of the MSCI World ex-Australia Index (with net dividends reinvested) in Australian dollars before taking into account fees, expenses, and tax.

iShares International Equity Index Fund

The strategy uses a full-replication approach to match the performance of the benchmark. This approach aims to purchase every security in the relevant index. We take into consideration the short-term transaction costs associated with acquiring a particular stock. Each security is held in the portfolio at or close to, its index weight. As a result, security-level tracking error and security-specified risk are minimised. The Fund aims to provide investors with the performance of the market, before fees, as measured by the MSCI World ex-Australia Net TR Index (unhedged in AUD) (Index).

Russell Investments International Shares Fund — Class A

The Fund invests predominantly in a broad range of international shares listed on stock exchanges in developed international markets. The Fund may also be exposed to emerging market shares. Derivatives may be used to obtain or reduce exposure to securities and markets, to implement investment strategies and to manage risk. To provide a total return, before costs and tax, higher than the Fund's benchmark over the long term by providing exposure to a diversified portfolio of predominantly international shares largely hedged into Australian dollars.

Magellan Global Fund

The Fund primarily invests in the securities of companies listed on stock exchanges around the world, but will also have some exposure to cash. The Fund can use foreign exchange contracts to facilitate settlement of stock purchases and to mitigate currency risk on specific investments within the portfolio. It is not our intention to hedge the foreign currency exposure of the Fund arising from investments in overseas markets. The primary objectives of the Fund are to achieve attractive risk-adjusted returns over the medium to long-term, while reducing the risk of permanent capital loss.

VanEck MSCI World ex Australia Quality (Hedged) ETF

The fund using a passive or indexing investment approach, attempts to approximate the investment performance of its benchmark index by investing in a portfolio of securities that generally replicates its benchmark index. The Fund aims to provide investment returns before fees and other costs which track the performance of the MSCI World ex Australia Quality (Hedged into AUD)

VanEck MSCI World ex Australia Quality ETF

The fund using a passive or indexing investment approach, attempts to approximate the investment performance of its benchmark index by investing in a portfolio of securities that generally replicates its benchmark index. The Fund aims to provide investment returns before fees and other costs which track the performance of the MSCI World ex Australia Quality Index

Conclusion

- No funds in the World Large Blend Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.5 World Large Growth Equity

Figure 6: Alpha VS Weighted Ratio of World Large Growth Equity

Table 7: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
14	T. Rowe Price Global Equity Fund - I Class	ETL0071AU	True	-	-	Approved	No
42	GQG Partners Global Equity Fund - A Class	ETL7377AU	True	-	-	Approved	No
43	Hyperion Global Growth Companies	HYGG-AU	True	-	-	Approved	No

T. Rowe Price Global Equity Fund - I Class

The Fund may be suitable for investors seeking the potential for moderate capital appreciation over time and greater diversification for their equity investments and can accept the volatility associated with investing in equities as well as the special risks that accompany global investing. The Fund's objective is to provide long-term capital appreciation by investing primarily in a portfolio of securities of companies which are traded, listed or due to be listed, on recognised exchanges and/or markets throughout the world. The portfolio may include investments in the securities of companies traded, listed or due to be listed, on recognised exchanges and/or markets, of developing countries.

GQG Partners Global Equity Fund - A Class

GQG Partners employs a disciplined investment process rooted in deeply held beliefs about investing. GQG Partners pursues a fundamental security selection process, conducting analyses of a company's financial statements, economic health, competitors and the markets that it serves. GQG Partners seeks to identify companies with a strong financial position, capable management, and promising growth opportunities, which GQG Partners believes are most likely to enjoy sustained earnings growth over time. GQG Partners combines an intensive focus on high quality companies with strong pricing discipline. The GQG Partners Global Equity Fund aims to seek long-term capital appreciation by investing directly or indirectly in equity securities and equity-linked securities anywhere in the world that GQG Partners believes can sustain long-term earnings growth and are available at a reasonable price. The objective of the Fund is to provide a rate of return (after fees and expenses and before taxes) which exceeds the return of the MSCI ACWI ex Tobacco (AUD).

Hyperion Global Growth Companies

Hyperion is a fundamental bottom-up growth style manager. To outperform the market by identifying and investing in high quality companies with a sustainable and transparent competitive advantage that can grow sales and earnings at rates higher than the general economy. To achieve medium to long-term capital growth and income by investing in high calibre companies primarily listed on a recognised global exchange, at the time of investment.

Conclusion

- No funds in the World Large Growth Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.6 World Currency Hedged Equity

Figure 7: Alpha VS Weighted Ratio of World Currency Hedged Equity

Table 8: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
15	iShares Hedged International Equity Index Fund	BGL0044AU	True	-	-	Approved	No
65	BlackRock Advantage Hedged International Equity Fund	BGL0109AU	True	-	-	Approved	No

iShares Hedged International Equity Index Fund

The Fund aims to provide investors with the performance of the market, before fees and the cost of hedging, as measured by the MSCI World ex-Australia Net TR Index (hedged in AUD) (index). To achieve its investment objective the Fund invests in units of the iShares Wholesale International Equity Index Fund (underlying fund), another fund managed by the company that has the same (unhedged) investment strategy as the Fund. The Fund also invests in currency forward contracts, which are used to implement the passive currency hedge.

BlackRock Advantage Hedged International Equity Fund

The fund's investment philosophy is that superior investment outcomes are most reliably reached through total performance management, including the management of return, risk, and cost. Our investment style – Scientific Investing – is centred on our belief that an optimal investment outcome is best achieved by knowledgeable people levered by technology. Key aspects include exploiting market inefficiencies, winning by not losing, and minimising implementation costs. The Fund aims to match the performance of the MSCI World ex Australia Index (unhedged/hedged in Australian dollars with net dividends reinvested) before fees.

Conclusion

- No funds in the World Currency Hedged Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.7 Global Infrastructure - Currency Hedged

Figure 8: Alpha VS Weighted Ratio of Global Infrastructure - Currency Hedged

Table 9: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
16	Magellan Infrastructure Fund	MGE0002AU	True	-	-	Approved	No
53	VanEck FTSE Global Infrastructure (Hedged) ETF	IFRA-AU	True	-	-	Approved	No

Magellan Infrastructure Fund

The Fund primarily invests in the securities of companies listed on stock exchanges around the world, but will also have some exposure to cash. The Fund can use foreign exchange contracts to facilitate settlement of stock purchases and to mitigate currency risk on specific investments within the portfolio. It is our intention to substantially hedge the capital component of the foreign currency exposure of the Fund arising from investments in overseas markets back to Australian Dollars. The primary objective of the Fund is to achieve attractive risk adjusted returns over the medium to long-term, while reducing the risk of permanent capital loss.

VanEck FTSE Global Infrastructure (Hedged) ETF

The fund using a passive or indexing investment approach, attempts to approximate the investment performance of its benchmark index by investing in a portfolio of securities that generally replicates its benchmark index. The Fund aims to provide investment returns before fees and other costs which track the performance of the FTSE Developed Core Infrastructure 50/50 Hedged into Australian Dollars Index

Conclusion

- No funds in the Global Infrastructure - Currency Hedged peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.8 Australian Bonds

Figure 9: Alpha VS Weighted Ratio of Australian Bonds

Table 10: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
17	Smarter Money	ETL6313AU	True	-	-	Approved	No
20	UBS Australian Bond Fund	SBC0813AU	True	-	-	Approved	No
21	Schroder Fixed Income Fund	SCH0028AU	True	-	-	Approved	No
23	iShares Australian Bond Index Fund	BGL0105AU	True	-	-	Approved	No
24	Vanguard Australian Fixed Interest Index Fund	VAN0001AU	True	-	-	Approved	No
48	Janus Henderson Tactical Income Active ETF Managed	TACT-AU	True	-	-	Approved	No
49	Vanguard Australian Government Bond Index ETF	VGB-AU	True	-	-	Approved	No

Smarter Money

An active, diversified portfolio of Australian deposits and investment grade floating-rate notes with a weighted-average “A” credit rating. The fund can also invest in these types of securities when they are issued overseas, or by overseas entities (into the Australian market or offshore) with the currency risk fully hedged. The fund generates consistent alpha by negotiating superior risk-free deposit interest rates and exploiting inefficiencies in the short-term yield curve, using a highly contrarian and dynamic asset-allocation strategy between cash & floating-rate notes, without taking capital risks. We do not invest in fixed-rate bonds (unless interest rate risk is hedged), sub-investment grade bonds, direct loans, equities, capital notes, preference shares (eg, hybrids), use leverage, or take currency risk. Value is added via active asset-selection using a range of valuation models with the aim of delivering lower portfolio volatility with higher liquidity than traditional bond funds, and providing superior risk-adjusted returns, without seeking interest rate risk, credit risk or liquidity risk. The Fund targets returns that outperform the Reserve Bank of Australia’s (RBA’s) cash rate by 1.0% to 2.0% pa after management costs, over a rolling 12 month period.

UBS Australian Bond Fund

Eligible investments of the Fund comprise fixed income and cash equivalent securities. Investments of the Fund may include government, semi-government and corporate bonds; mortgage and other asset backed securities. At the time of purchase, all securities of the Fund must be of investment grade credit rating. The Fund may choose not to sell securities that are downgraded below investment grade after their purchase. The Fund may also invest in financial derivatives to gain or reduce exposure to relevant markets and manage investment risk. Foreign currency exposures are hedged to \$A. The Fund aims to outperform (after management costs) the Bloomberg AusBond Composite 0+Yr Index over rolling three year periods.

Schroder Fixed Income Fund

The Schroder Fixed Income Core-Plus Strategy is an actively managed, low volatility strategy that invests in a range of domestic and international fixed income assets with the objective of outperforming the Bloomberg AusBond Composite 0+Yr Index , whilst delivering stable absolute returns over time. It adopts a Core-Plus investment approach whereby a core portfolio comprised of Australian investment grade bonds is complemented by investments in a diverse range of global and domestic fixed income securities. Investments within the portfolio are actively managed in an attempt to ensure we are in the right assets at the right time to maximise return while maintaining a low risk profile. The targeted result is a defensive strategy which is broadly diversified with low correlation to equity markets. To outperform the Bloomberg AusBond Composite 0+Yr Index after fees over the medium term.

iShares Australian Bond Index Fund

BlackRock acquired Barclays Global Investors (BGI) in December of 2009. BGI has been operating their index business in the Australian institutional market since July 1998. BlackRock acquired the index business to add to their suite of investment offerings. The Fund aims to provide investors with the performance of the market, before fees, as measured by the Bloomberg AusBond Composite 0+ Yr Index (Index).

Vanguard Australian Fixed Interest Index Fund

The fund offers a true to label fixed interest strategy that preserves the diversification and risk characteristics of the asset class by investing in a broad range of high grade securities. The Fund seeks to track the return of the Bloomberg AusBond Composite 0+ Yr Index before taking into account fees, expenses, and tax. The Bloomberg AusBond Composite 0+ Yr Index is a market value-weighted index of securities (bonds) issued by the Commonwealth Government of Australia, Australian State Government financing authorities and treasury corporations, as well as investment-grade corporate issuers.

Janus Henderson Tactical Income Active ETF Managed

The Fund is an actively managed strategy that invests in a wide range of cash and fixed interest securities. These include debt issued by banks and other corporations, mortgage and other asset backed securities and government, semi-government and supra-national bonds. The Fund may also allocate to Australian and global high yielding securities when attractive opportunities are identified. The Fund is designed to leverage the considerable expertise of the Manager and gives them the flexibility to tactically and actively allocate the Fund's assets based on their assessment of the outlook for the Australian and global economy, interest rates and fundamentals of the corporate sector within the context of the credit cycle. The flexible asset allocation ranges and fundamentally driven approach allows the Manager to meaningfully adjust the level of fixed interest exposure to both enhance performance in periods of falling interest rates and conversely, to protect value from the adverse impact of rising yields. The overall level of credit risk within the Fund is actively adjusted to reflect the Manager's assessment of fundamentals and valuations within the corporate debt market. The Fund seeks to achieve a total return after fees that exceeds the total return of the Benchmark, by investing in a diversified portfolio of predominantly Australian income producing assets.

Vanguard Australian Government Bond Index ETF

Vanguard employs an index management strategy designed to track the return of the Bloomberg AusBond Govt 0+ Yr Index. This is achieved by holding all of the securities included in the index where possible, or a representative sample of these securities. Vanguard selects the securities it holds based on liquidity, access to markets, portfolio cash-flow and minimum trade quantities with the aim of tracking the return of the index.

Conclusion

- No funds in the Australian Bonds peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.9 Domestic Cash

Figure 10: Alpha VS Weighted Ratio of Domestic Cash

Table 11: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
18	Russell Australian Cash	RIM0041AU	True	-	-	Approved	No
19	Pendal Short Term Income Securities Fund	WFS0377AU	True	-	-	Approved	No

Russell Australian Cash

The Fund invests in bank deposits and money market instruments, including but not limited to bank bills and certificates of deposit. To provide a total return, before costs and tax, in line with the Fund's benchmark over the short term by providing exposure to a diversified portfolio of Australian dollar investment grade cash and cash equivalents.

Pendal Short Term Income Securities Fund

The Pendal Short Term Income Securities Fund is an actively managed portfolio of primarily Australian cash and fixed interest securities. The Fund aims to provide a return (before fees, costs and taxes) that exceeds the Bloomberg AusBond Bank Bill Index.

Conclusion

- No funds in the Domestic Cash peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.10 Global Bonds

Figure 11: Alpha VS Weighted Ratio of Global Bonds

Table 12: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
22	PIMCO Diversified Fixed Interest Fund — Wholesale Class	ETL0016AU	True	-	-	Approved	No
50	PIMCO Global Bond Fund — Wholesale Class	ETL0018AU	True	-	-	Approved	No
51	Vanguard Global Aggregate Bond Index Fund (Hedged)	VAN9309AU	True	-	-	Approved	No

PIMCO Diversified Fixed Interest Fund — Wholesale Class

The Diversified Fixed Interest is a diverse, actively managed portfolio of that aims to provide a diversified exposure to both global and Australian fixed interest securities. With a strategic 50% allocation to both the Australian and Global bond markets, the fund aims to take advantage of opportunities locally and globally. To achieve maximum total return by investing in Australian and overseas bonds and to seek to preserve capital through prudent investment management.

PIMCO Global Bond Fund — Wholesale Class

The Global Bond Fund is a diverse, actively managed portfolio of global fixed-income securities. The average duration of the fund will normally vary within +/-3 years of the benchmark. The fund invests primarily in a diversified portfolio of investment grade bonds denominated in major world currencies. To achieve maximum total return by investing in global fixed interest securities, and to seek to preserve capital through prudent investment management.

Vanguard Global Aggregate Bond Index Fund (Hedged)

The Fund provides low cost exposure to high-quality, income-generating securities issued by governments, government-owned entities, government-guaranteed entities, investment-grade corporate issues and securitised assets from around the world. The investments in the Fund are predominantly rated BBB- or higher by Standard & Poor's or equivalent ratings agency. The Fund is hedged to Australian dollars so the value of the Fund is relatively unaffected by currency fluctuations. The Fund seeks to track the return of the Bloomberg Barclays Global Aggregate Float-Adjusted and Scaled Index hedged into Australian dollars before taking into account fees, expenses and tax.

Conclusion

- No funds in the Global Bonds peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.11 Diversified Aggressive

Figure 12: Alpha VS Weighted Ratio of Diversified Aggressive

Table 13: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
25	Vanguard Wholesale High Growth Index Fund	VAN0111AU	True	-	-	Approved	No
58	BlackRock High Growth Multi-Index	BLK1166AU	True	-	-	Approved	No

Vanguard Wholesale High Growth Index Fund

The Fund's strategic allocation reflects a 90% allocation to growth assets and a 10% allocation to income assets. The Fund seeks to track the weighted average return of the various indices of the underlying funds in which the Fund invests in proportion to the Strategic Asset Allocation (SAA) for the Fund, before taking into account fees, expenses and tax.

BlackRock High Growth Multi-Index

Aims to provide investors with the performance of its composite benchmark, before fees and the cost of hedging. The benchmark comprises a portfolio of published indices that provide exposure to a range of domestic and global asset classes, consistent with a high growth-oriented strategic asset allocation.

Conclusion

- No funds in the Diversified Aggressive peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.12 Diversified Growth

Figure 13: Alpha VS Weighted Ratio of Diversified Growth

Table 14: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
26	Vanguard Wholesale Growth Index Fund	VAN0110AU	True	-	-	Approved	No
61	BlackRock Tactical Growth Fund	PWA0822AU	True	-	-	Approved	No
62	BlackRock Growth Multi Index	BLK9560AU	True	-	-	Approved	No

Vanguard Wholesale Growth Index Fund

The Fund's strategic allocation reflects a 70% allocation to growth assets and a 30% allocation to income assets. The Fund seeks to track the weighted average return of the various indices of the underlying funds in which the Fund invests in proportion to the Strategic Asset Allocation (SAA) for the Fund, before taking into account fees, expenses and tax.

BlackRock Tactical Growth Fund

The investment strategy of the Fund is to provide investors with a diversified exposure to the best investment teams and strategies that the BlackRock Group has globally within the context of an Australian based "growth" investment portfolio.

BlackRock Growth Multi Index

Aims to provide investors with the performance of its composite benchmark, before fees and the cost of hedging. The benchmark comprises a portfolio of published indices that provide exposure to a range of domestic and global asset classes, consistent with a 70:30 growth strategic asset allocation.

Conclusion

- No funds in the Diversified Growth peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.13 Diversified Balanced

Figure 14: Alpha VS Weighted Ratio of Diversified Balanced

Table 15: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
27	Vanguard Wholesale Balanced Index Fund	VAN0108AU	True	-	-	Approved	No
59	BlackRock Balanced Multi Index	BLK1918AU	True	-	-	Approved	No

Vanguard Wholesale Balanced Index Fund

Vanguard may from time to time vary the investment strategy of the Fund, including by changing the target benchmark for the Fund. Vanguard will notify investors of any such changes. The Fund seeks to track the weighted average return of the various indices of the underlying funds in which the Fund invests in proportion to the Strategic Asset Allocation (SAA) for the Fund, before taking into account fees, expenses and tax.

BlackRock Balanced Multi Index

Seeks to provide investors with the performance of its composite benchmark, before fees and the cost of hedging. The benchmark comprises a portfolio of published indices that provide exposure to a range of domestic and global asset classes, consistent with a 50:50 balanced strategic asset allocation.

Conclusion

- No funds in the Diversified Balanced peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.14 Diversified Moderate

Figure 15: Alpha VS Weighted Ratio of Diversified Moderate

Table 16: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
28	Vanguard Wholesale Conservative Index Fund	VAN0109AU	True	-	-	Approved	No

Vanguard Wholesale Conservative Index Fund

The Fund's strategic allocation reflects a 30% allocation to growth assets and a 70% allocation to income assets. The Fund seeks to track the weighted average return of the various indices of the underlying funds in which the Fund invests in proportion to the Strategic Asset Allocation (SAA) for the Fund, before taking into account fees, expenses and tax.

Conclusion

- No funds in the Diversified Moderate peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.15 Diversified Flexible

Figure 16: Alpha VS Weighted Ratio of Diversified Flexible

Table 17: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
29	MLC Wholesale Inflation Plus — Assertive Portfolio	MLC0667AU	True	-	-	Approved	No

MLC Wholesale Inflation Plus — Assertive Portfolio

LTAR is innovative and a unique product. The long-term nature of the Fund's Neutral Strategy (20+ years) allows it to avoid peer constraints and invest in more illiquid and unconventional strategies than traditional balanced funds. The portfolio aims to deliver a return of 4.5% p.a. above inflation (after management costs), subject to limiting the risk of negative returns over 7-year periods.

Conclusion

- No funds in the Diversified Flexible peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.16 Australia Real Estate Equity

Figure 17: Alpha VS Weighted Ratio of Australia Real Estate Equity

Table 18: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
30	iShares Australian Listed Property Index Fund	BGL0108AU	True	-	-	Approved	No
31	Vanguard Property Securities Index Fund	VAN0004AU	True	-	-	Approved	No
63	Vanguard Australian Property Securities Index ETF	VAP-AU	True	-	-	Approved	No

iShares Australian Listed Property Index Fund

The strategy uses a full replication approach to achieve the performance of its benchmark. This approach aims to purchase every security in the relevant index. We take into consideration the short term transaction costs associated with acquiring a particular stock. Each security is held in the portfolio at, or close to, its index weight. As a result, security level tracking error and security specific risk are minimised. The Fund aims to provide investors with the performance of the market, before fees, as measured by the S&P/ASX 300 A-REIT TR Index (Index).

Vanguard Property Securities Index Fund

The fund is managed to closely track the risk characteristics of the index, while minimising transaction costs and effectively managing index changes. The fund will hold all of the property securities in the index (at most times), allowing for individual security weightings to vary marginally from the index from time to time. The Vanguard Australian Property Securities Index Fund seeks to track the return of the S&P/ASX 300 A-REIT Index before taking into account fees, expenses and tax.

Vanguard Australian Property Securities Index ETF

The fund employs an index management strategy designed to track the performance of the S&P/ASX 300 A-REIT index. To closely track the index, the fund will aim to hold all of the property securities in the index at most times) allowing for individual security weightings to vary marginally from the index from time to time.

Conclusion

- No funds in the Australia Real Estate Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.17 Australia Mid Small Growth Equity

Figure 18: Alpha VS Weighted Ratio of Australia Mid Small Growth Equity

Table 19: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
36	DNR Capital Australian Emerging Companies Fund	PIM4357AU	True	-	-	Approved	No

DNR Capital Australian Emerging Companies Fund

The DNR Capital Australian Emerging Companies Fund has an investment style best described as 'style neutral'. The security selection process has a strong bottom-up discipline and focuses on buying quality emerging businesses at reasonable prices. The process involves comprehensive company and industry research, company visits and meetings, and detailed valuation analysis and modelling. This information is used to assess the quality of a business, and the expected return. The Fund's investment objective is to invest in a portfolio of Australian emerging companies that aims to outperform the Benchmark (net of fees) over a rolling five -year period. The investment objective is not a forecast of the Fund's performance.

Conclusion

- No funds in the Australia Mid Small Growth Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.18 Europe Equity

Figure 19: Alpha VS Weighted Ratio of Europe Equity

Table 20: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
39	BlackRock iShares Europe ETF	IEU-AU	True	-	-	Approved	No

BlackRock iShares Europe ETF

The Fund seeks to track the investment results of the S&P Europe 350TM (the “Underlying Index”), which measures the performance of the stocks of leading companies in the following countries: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom. The market capitalization of constituent companies is adjusted to reflect only those stocks that are available to non-U.S. investors.

Conclusion

- No funds in the Europe Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.19 World Other Equity

Figure 20: Alpha VS Weighted Ratio of World Other Equity

Table 21: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
40	BlackRock iShares S&P 500 AUD Hedged ETF	IHVV-AU	True	-	-	Approved	No
41	BlackRock iShares Core S&P 500 ETF	IVV-AU	True	-	-	Approved	No

BlackRock iShares S&P 500 AUD Hedged ETF

The Fund aims to provide investors with the performance of the market, before fees and expenses (including the cost of hedging), as represented by an index composed of large capitalisation U.S. equities (hedged to Australian dollars). The iShares Core S&P 500 ETF seeks to track the investment results of an index composed of large-capitalization U.S. equities.

BlackRock iShares Core S&P 500 ETF

The iShares Core S&P 500 ETF seeks investment results that correspond to the price and yield performance of U.S. large-cap stocks, as represented by the Standard & Poor's 500 Index. The Index is a capitalization-weighted index from a broad range of industries chosen for market size, liquidity and industry group representation. The component stocks are weighted according to the total float-adjusted market value of their outstanding shares.

Conclusion

- No funds in the World Other Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.20 World Mid Small Equity

Figure 21: Alpha VS Weighted Ratio of World Mid Small Equity

Table 22: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
44	Dimensional Global Small Company Trust	DFA0106AU	True	-	-	Approved	No

Dimensional Global Small Company Trust

The Fund invests in eligible companies will typically be in proportion to their market capitalisation within each country. However to manage turnover and taxation considerations the Trust may not exactly match specific company weights. A hold or buffer range for sales minimises transaction costs and keeps portfolio turnover low. Issues that migrate above the hold range are sold and proceeds reinvested in the buy range. To provide long-term capital growth by gaining exposure to a diversified portfolio of small companies associated with approved developed markets (excluding Australia).

Conclusion

- No funds in the World Mid Small Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.21 Asia Pacific ex Japan Equity

Figure 22: Alpha VS Weighted Ratio of Asia Pacific ex Japan Equity

Table 23: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
45	BlackRock iShares Asia 50 ETF	IAA-AU	True	-	-	Approved	No

BlackRock iShares Asia 50 ETF

The Fund seeks to achieve its objective by tracking the performance of the S&P Asia 50TM Net TR Index (AUD). The fund aims to provide investors with the performance of the S&P Asia 50 Index, before fees and expenses. The index is designed to measure the performance of the 50 leading companies listed in China, Hong Kong, Macau, Singapore, South Korea and Taiwan.

Conclusion

- No funds in the Asia Pacific ex Japan Equity peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.22 Diversified Credit

Figure 23: Alpha VS Weighted Ratio of Diversified Credit

Table 24: Marked funds details

VanEck Gold Bullion ETF

The fund using a passive or indexing investment approach, attempts to approximate the investment performance of its benchmark index by investing in a portfolio of securities that generally replicates its benchmark index. The Fund aims to provide investment returns before fees and other costs which track the performance of the NYSE Arca Gold Miners Index AUD

Conclusion

- No funds in the Commodities peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.24 Alternatives - Growth Illiquid

Figure 25: Alpha VS Weighted Ratio of Alternatives - Growth Illiquid

Table 26: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
55	Hamilton Lane Global Private Assets	PIM8461AU	-	-	-	-	No
57	Metrics Real Estate Multi-Strategy Fund	MRE-AU	-	-	-	-	No

Hamilton Lane Global Private Assets

The Hamilton Lane Global Private Assets Fund (AUD) is an Australian registered managed investment scheme. The Fund is an Australian Unit Trust that provides investor exposure into a portfolio of private assets across a diverse group of strategies, industries, geographies, sectors, and general partners. The Fund provides investors the ability to subscribe or redeem on a monthly basis, subject to restrictions. The investment objective of the Fund is to obtain capital appreciation over the medium- and longterm through investments in private assets globally. The Fund will make indirect investments in private assets globally and build a diversified portfolio over time to avoid concentrated risk exposures and to provide sufficient liquidity for limited redemptions.

Metrics Real Estate Multi-Strategy Fund

The Metrics Real Estate Multi-Strategy Fund seeks to provide investors with exposure to a diversified portfolio of private markets CRE Investments covering the entire capital structure from Senior Secured first registered mortgage Debt investments through to Equity with a view to deliver to investors the Target Total Return. The Fund seeks to provide monthly cash income, seeks to preserve investor capital and manage investment risks, whilst providing potential Equity upside.

Conclusion

- No funds in the Alternatives - Growth Illiquid peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.25 Diversified Conservative

Figure 26: Alpha VS Weighted Ratio of Diversified Conservative

Table 27: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
60	BlackRock Conservative Multi-Index	BLK5551AU	True	-	-	Approved	No

BlackRock Conservative Multi-Index

Aims to provide investors with the performance of its composite benchmark, before fees and the cost of hedging. The benchmark comprises a portfolio of published indices that provide exposure to a range of domestic and global asset classes, consistent with a conservative-oriented strategic asset allocation.

Conclusion

- No funds in the Diversified Conservative peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

4.26 Global Real Estate

Figure 27: Alpha VS Weighted Ratio of Global Real Estate

Table 28: Marked funds details

No.	Fund	APIR	Alpha Test	Weighted Ratio Test	Factor Test	Results	Outperf
64	Vanguard International Property Securities Index Fund (Hedged)	VAN0019AU	True	-	-	Approved	No

Vanguard International Property Securities Index Fund (Hedged)

The Fund will hold most of the securities in the index, allowing individual security weightings to vary marginally from the index from time to time. The Fund may invest in securities that have been removed from or are expected to be included in the index. The Fund will be fully exposed to the fluctuating values of foreign currencies, as there will not be any hedging of foreign currencies to the Australian dollar. The Fund seeks to track the return of the FTSE EPRA/NAREIT Developed ex Australia Rental index (with net dividends reinvested) in Australian dollars before taking into account fees, expenses, and tax. The FTSE EPRA/NAREIT Developed ex Australia Rental index comprises property securities (shares) listed on the exchanges of the world's major developed economies.

Conclusion

- No funds in the Global Real Estate peer group have failed both stage 1 and stage 2 test
- All funds shown on the chart above in this category are within the tolerance range and remain approved.

5 Appendix A - Funds Results

Table 29 below summarises the results of our findings. To interpret the table:

- Alpha Test / Weighted Ratio Test / Factor Test: a result of True/False represents the fund has passed/failed the test
- Results: contains 4 statuses as clarified in Section 2 - Introduction, including Approved, On Watch, On Hold and Redeem
- Outperf: a result of Yes represents the fund comfortably exceeds its peer group in both the Alpha Test and Weighted Ratio Test within a 3-year assessed period
- Missing: a result of No / Less Than 3 yrs / Less Than 1 yr / Yes represents the fund contains over 3-year / 1 – 3 year / 0 – 1 year / 0 tracking records
