

Atchison

Investment Solutions for Financial Advisers

A photograph of a person standing in a snowy landscape under the aurora borealis. The person is standing on a frozen body of water, and the aurora is reflected in the water. The background shows snow-covered mountains and a starry sky.

Illuminating
the way forward

Who is Atchison?

Atchison is an asset consultant and investment management firm.

We provide expertise to financial advisers, professional investors, superannuation funds, charities and foundations.

This expertise comes in many ways including:

- ▲ Taking part in investment committees.
- ▲ Researching potential investment solutions.
- ▲ Constructing and stress testing client portfolios.
- ▲ Support in meeting evolving regulatory obligations.

Atchison's partnership

Atchison's partnership enables the ability to deliver stronger investment outcomes, and better governance, giving more time to prioritise your needs.

Our approach is underpinned by a comprehensive full suite of investments including separately managed accounts (SMAs), and individual asset class investments, such as:

- ▲ Fixed Income – Floating
- ▲ Fixed Income – Duration
- ▲ Australian Shares
- ▲ International Shares
- ▲ Real Assets - Property and Infrastructure
- ▲ Alternatives

Introducing SMAs

Separately Managed Accounts (SMAs) are one of the most popular tools used by financial advisers and for good reason.

At Atchison, we prefer SMAs which are a financial product, administered by any major platform and can be purchased off the investment menu.

They provide discretion to the adviser, to execute investment changes for every client all at once, and all but removes the need for costly paperwork and ROAs.

How we invest

Grounded in data and a clearly defined investment framework, Atchison's approach helps minimise emotional and behavioural biases.

Our core investment beliefs are:

- ▲ Always be compensated for taking risk
- ▲ Broad market exposure (beta) provides returns with minimal cost
- ▲ Asset allocation drives long-term returns
- ▲ Active management chases outperformance
- ▲ Rebalance quarterly
- ▲ Liquidity is your friend

How we think differently

We manage our own datasets, allowing for complete customisation and transparency.

Our investment approach is grounded in minimising risk and is underpinned by:

Building market return assumptions

44 asset class returns and 72 quarterly signals are modelled, monitoring 3,750 products per month.

Setting portfolio risk limits

Risk limits are determined based on the investment objective, looking beyond volatility.

Optimising asset allocation

Stress test the asset allocation models to ensure portfolios are optimised for multiple outcomes.

Building asset class sleeves

Sleeves are constructed using best of breed managers, managing style, sector, country exposures.

Applying Atchison's risk filter

Bottom-up stress testing of portfolios using Atchison's in-house proprietary data and modelling.

Stress testing the portfolio

Stress test the portfolio, holdings and objectives against multiple economic outcomes.

Monitoring and rebalancing

Institutional grade portfolio optimisation to guide rebalancing, identify red flags.

Atchison's (SMAs)

Investment Product	Strategy	Benchmark	Objective	Time Frame	Investable Universe	Target Asset Allocation	Managed Account Fee*	Minimum Investment
