

Portfolio Update – 30th July 2025

Tactical Asset Allocation Q3 2025

- **Neutral Australian equities** – encouraged by anticipated rate cuts, trading at record highs.
- **Increased international equities** – due to a subdued reaction following tariff updates, Iran-Israel ceasefire, anticipated rate cuts globally.
- **Increased European equities** – benefiting from European Central Bank (ECB) easing cycle, interest from foreign investors, along with diversification away from US tech dominance.
- **Underweight real assets** – cautious on listed infrastructure amid moderating inflation.
- **Increased alternatives** – selective preference for private equity, and gold. Moving sleeve away from defensive focus to a balanced 50/50 growth and defensive blend.
- **Increased duration** - capitalising on anticipated rate cuts in most developed markets.
- **Reduced floating rate** – favouring investment grade relative to high yield and bank hybrids.
