Market Update

It is expected that the median growth superannuation fund returned around +1.5% to members over the month of July 2025.

The Australian share market rose for the fourth consecutive month rising +2.3% for the month and a +11.7% for the 12 months to July 2025. Performance during the year was mainly driven by Technology and Healthcare sectors.

International share markets exhibited notable gains in July 2025, returning (unhedged) +3.1% for the month, and +17.5% for the 12 months. This performance reflects a rebound from earlier market volatility, supported by strong corporate earnings and recent easing in political tensions.

This was driven by strong performance from the US stock market, in US terms returning +4.1% in July and around +17% for the year. The S&P 500 and Nasdaq set new record closes during the month as mega-cap tech led; Japan's Topix also hit a record.

Emerging market equities (unhedged) delivered robust performance in July 2025 up +3.2%, outpacing many developed markets and reinforcing their appeal amid shifting global dynamics, supported by weaker US dollar, easing trade tensions, economic fundamentals and valuation appeal.

July 2025 highlighted Australia's economic resilience amid global challenges, with stable inflation, a robust labour market, and proactive fiscal and migration policies.

Australia's inflation showed signs of easing, with the annual rate dropping to 2.1% in June from 2.4% in May, aligning closely with the Reserve Bank of Australia's (RBA) target range of 2–3%. Decline driven by petrol prices. This is the lowest annual inflation rate since the March 2021 quarter.

The RBA met in July and decided to hold the cash rate at 3.85% as the board awaited further evidence of inflation durability within target.

Long-end yields were volatile; US 30-year briefly traded near 5% mid-month amid tariff and fiscal concerns. In Australia, ACGBs finished higher over July (3-year ~3.42%, 10-year ~4.26%).

US inflation, June CPI data was released 15 July, indicating a rise 0.3% m/m and 2.7% y/y, reinforcing a “wait-for-more-data” Fed.

The FOMC kept the funds rate at 4.25%–4.50%, noting uncertainty and ongoing balance-sheet runoff. Two governors dissented in favour of a 25bp cut, an unusual split.

The Bank of Japan kept its policy stance unchanged and pushed back on further hikes, as domestic core inflation firmed but growth risks persisted.

The ECB left all three policy rates unchanged, saying inflation is around the 2% medium-term target and refrained from pre-committing on the path ahead.
